Dear Colleague

Re. Clinical Lead

We recently sent a letter informing you of the name of the clinical lead for your care home. Since that original letter there have been some changes and I am writing to confirm the name of your clinical lead.

The name of your clinical lead is XXX.

The clinical lead will help to co-ordinate services for the residents in your home and develop trusted relationships with both care home staff and other the professionals involved.

The clinical lead will ensure there is:

- A weekly 'check in' with you, usually in the form of a phone call, to discuss any residents that you are concerned about.
- Support for the development of personalised care and support plans for your residents.
- Support with pharmacy and medication.

The clinical lead is not responsible for the clinical care of specific patients within the home, these remain the responsibility of their registered GP.

Re-registration of patients is not required at this time, although there will be further communication about this shortly.

We will also be sending more information in the form of Frequently Asked Questions in the coming days but if you have any queries in the meantime please email nhsbsolccg.communitytransformation@nhs.net

Yours faithfully

Helen Kelly

Helen Kelly
Associate Director of Integration (Urgent Care/ Community)
