## Description

The Primary Care clinical pharmacist has an important role in improving the healthcare we provide to our patients. We are recruiting for an experienced clinical pharmacist to work with the existing practice team to deliver consistency and excellence in medicines and prescribing.

The successful candidate will have access to a dynamic and forward-thinking team of clinical pharmacists employed by Our Health Partnership and more specifically working in KEN PCN.

We are looking for a pharmacist, who will work as part of a multi-disciplinary team, developing and managing medicines and prescribing services within our practice. The successful applicant will be able to demonstrate improvements in value and patient outcomes and contribute to reducing health inequalities through the safe and appropriate use of medicines.

The role will be a mix of pre-booked clinics involving telephone and or face to face interaction with patients alongside conducting structured medication reviews, re-authorising of repeat medication, responding to prescription request queries (which may include re-issuing of acute medication within your competence) and reconciling post-discharge medication.

**The successful applicant must have previous primary care experience and be a competent independent prescriber.**
